

Leica Piper 100 Pipe Laser

The world's most versatile pipe laser

Powerful and compact, the Leica Piper is the only pipe laser that fits inside a 100mm (four inch) pipe. It is built with solid cast-aluminium housing, and is loaded with features that will improve productivity and minimise downtime on the jobsite.

It is ideal anywhere line and grade is required. It has a large clear display that makes it easier for contractors to read grade, line position, battery status and level indication. The intelligent battery monitors the amount of charge/discharge, so that contractors always know how much battery life they have left. The Leica Piper's bright, visible beam is focused to maintain its crisp, clear spot and size over long distances. Automatic grade compensation easily identifies and corrects grade errors. It automatically self-levels over a full grade range and eliminates the need to tip the laser for steep slopes.

- Rechargeable battery
- Charger
- Target assembly
- Optional remote control

Technical Data	Leica Piper 100
Beam	Highly visible red beam
Display	Large, easy to read LCD display
Line and grade locks	Yes
Wide line adjustment	Yes
Self-levelling	Over full range
Grade entry	Direct or by digit
Remote control	Yes, wireless
Housing	Rock solid metal
Battery pack	Rechargeable Lithium-Ion
Waterproof	100%
